

SELECTADNA™

DNA FORENSIC MARKING

SelectaDNA property marking kit

SelectaDNA is a security product which both deters crime and provides irrefutable evidence of true ownership. This helps link criminals to crime scenes thus improving the likelihood of convictions.

Property marking kits contain:

- Owner's registration form with bottle bar code label and instructions card
- 30ml of SelectaDNA containing 1,000 uniquely coded microdots
- Foam Tipped Applicator – sufficient for approximately 50 items
- Tamper proof warning labels
- Window stickers
- Lifetime registration onto their secure LPCB Police approved database

Estimated Price £20 - £30 per kit

Questions & Answers

Q. What exactly does the product consist of?

A. Each pot contains a unique synthetic DNA held in a water-based UV adhesive, containing hundreds of microdots.

Q. Will the solution transfer onto your hands when touched?

A. No. Some SelectaDNA products, such as Grease and Gel, will transfer. The Property Marking kit solution will not.

Q. Is the DNA safe?

A. Yes, it is environmentally safe and non-toxic.

Q. Why does selectaDNA contain a UV tracer?

A. So if a stolen item is recovered, the police can easily locate the DNA with a UV lamp in order to take a sample for analysis.

Q. What information is held on the microdots?

A. The customer's unique selectaDNA registration code, along with our LPS1224 database telephone number, on which the customers details are held.

Q. Is the database totally secure?

A. Yes, it conforms to the Loss Prevention Certification Board's standards, so it is totally secure and is available 24 hours a day, 7 days a week, to the Police.

Q. Is there an annual licence fee associated with the database?

A. No, there are no annual charges or renewal fees. The only cost of the SelectaDNA product is the one-off purchase price.

Q. So does that mean that any marked item is registered for its entire life?

A. Yes it does.

Q. What do the microdots look like?

A. They are tiny pin-head sized flat circular dots which are just visible to the naked eye. Under a microscope you are able to read the unique customer code and database phone number.

Q. Why should we use the warning labels and window stickers?

A. These act as a superb theft deterrent as they warn thieves, from both inside and outside the building, that items are 'DNA Protected'. The warning labels are tamper resistant so break up into tiny pieces if removal is attempted.

Q. What happens if I sell or give away a marked item?

A. By informing Selectamark of the details of the item and the new owner, we will keep a record of this on the database.

Q. What happens if a thief manages to remove all the Microdots from a stolen item?

A. By applying the solution to grooves, crevices and textured surfaces, a trace of the adhesive (containing both the UV Tracer and DNA) will always be available for forensic analysis.

Q. What accreditation does Selectamark have?

A. Selectamark is ISO 9001-2000 accredited, and has LPS 1224 accreditation for their secure database. They were established in 1985 and hold a Secured by Design licence.

How to order:-

Available from the LV= Streetwise Safety Centre, Elliott Road, Bournemouth BH11 8JJ

- **Order** by telephone (01020) 591330 or email helen@streetwise.org.uk
